Latihan 1

Flowchart:

Pseudocode:

program	Menghitung jam belajar
deklarasi	Int jam Double hari, totalJam

algoritma	Set totalJam = 0 Set hari = 1 WHILE hari <= 7 DO Input jam IF jam > 10 THEN Output “Input tidak mungkin, ulangi” CONTINUE END IF Total += jam Hari ++ END WHILE Output Total jam

Program:

```java
package Teori.pertemuan_9;

import java.util.Scanner;

public class jamBelajar {
    Run | Debug
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        double totalJam = 0, jam;
        int hari = 1;

        while (hari <= 7) {
            System.out.print("Masukkan jam belajar hari ke-" + hari + ": ");
            jam = sc.nextDouble();

            if (jam > 10) {
                System.out.println("Input tidak mungkin (> 10 jam), ulangi input!");
                continue;
            }

            totalJam += jam;
            hari++;
        }

        System.out.println("Total jam belajar selama seminggu: " + totalJam + " jam");
        sc.close();
    }
}
```

Latihan 2

Flowchart:

Pseudocode:

Program	Bonus karyawan
Deklarasi	Double jamKerja, gajiHarian, bonus
algoritma	DO Input jamKerja IF jamKerja < 0 THEN NREAK END IF Input gajiHarian IF jamKerja > 8 THEN Bonus = 0.2 * gajiHarian ELSE bonus = 0 END IF Output bonus WHILE jamKerja > = 0 Output “program selesai”

Program:

```java
package Teori.pertemuan_9;

import java.util.Scanner;

public class bonusKaryawan {
    Run | Debug
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        int jamKerja;
        double gajiHarian, bonus;

        do {
            System.out.print("Masukkan jam kerja: ");
            jamKerja = sc.nextInt();

            if (jamKerja < 0) {
                break;
            }

            System.out.print("Masukkan gaji harian: ");
            gajiHarian = sc.nextDouble();

            if (jamKerja > 8) {
                bonus = 0.2 * gajiHarian;
            } else {
                bonus = 0;
            }
            System.out.println("Bonus pegawai: " + bonus);
        } while (jamKerja >= 0);

        System.out.println("Program selesai.");
        sc.close();
    }
}
```
